ONE OF A KIND

THIS BRIGHT AND ECLECTIC KITCHEN SHINES WITH PERSONALIZED TOUCHES, MAKING IT FEEL CUSTOMIZED.

ABOUT THE PROJECT:

When the semi-retired homeowners of this 1920s Virginia house decided to renovate, they knew they wanted to brighten up their dark and drab kitchen in a unique and fun way that enhanced the classic and historic architecture and design. Increasing the functionality was another key goal. "Our clients wanted to have a kitchen that was reflective of their eclectic style and was functional," Kieran Fannan, project architect at TriVistaUSA Design + Build, says. The yellow oven and paint brighten the space. "The overall aesthetic matched the traditional style of their 100+ year old house and incorporated the bright colors that the client was drawn to," Kieran says.

BIGGEST CHALLENGE:

Meeting deadlines proved to be the most difficult aspect of this project. "The clients wanted to have their renovation completed in time for their daughter's wedding, while balancing issues with long lead times lingering from the pandemic (the yellow oven in particular)," Kieran says. "With a lot of hard work from our build team and subcontractors, we were able to get the project completed in time."

EDITOR'S TAKEAWAY:

The yellow oven is such an eye-catcher, perfectly contrasting against the muted blue cabinetry, and gives the space such a fun vibe. We also appreciated the unconventional and exciting teal and yellow palette in the adjoining breakfast nook – the yellow a perfect way to tie the two spaces together while also creating a distinctly new space with its own look and feel.
